Requirements for Possible Shipment of Guided Missile Associated Chemical Products through Chemapol, Prague, to the Soviet Union.

REFERENCE: Request for Requirements dated 14 May 1958, E-58-281, 3a) Westerner in the chemical business who visits Chemapol in Prague.

It is very possible that Chemapol in Prague is supplying equipment and/or chemicals to the Soviet Union for use in the Soviet guided missile program. Information on the following is required in this connection:

1. The following chemical substances having missile applications which the Soviet Union, because of necessity or convenience, may import through Chemapol.

- a. fluorine
- b. kerosene products
- c. perchlorates
- d. polyurethane
- e. hydrazine or hydrazine hydrate
- f. catechol
- g. high temperature resistant plastics e.g. fluorocarbons.
- h. silicones
- i. phenolics with silica or asbestos
- j. special lubricants
- k. metallic sulphur dust
- l. orthophosphoric acid

2. The quantities of the above products involved in trade agreements with the Soviet Union.

3. The financial terms and trade arrangements involving the above products.

4. The Soviet organizations involved in the negotiations for, and the transfer and use of the above products.

- 2 -

5. The name and location of any Soviet facility for which these products are destined.

6. All of the above information is also required for any chemical products other than those listed above which might have a missile application.

7. The names and positions of any Soviet personnel specially involved in the negotiations for, or the transfer or use of products which might possibly have Soviet missile program applications. Such personnel may be members of a special mission concerned with the procurement of specific items for the Soviet guided missile program. The names and locations of any factories or institutions in the Soviet Union which they represent, or are in contact with, would be particularly important.

8. These requirements have been coordinated with the Office of Scientific Intelligence and ORR/M/CH.
